OBJECTIVE
Work with back-end development, applying my full stack experience to build secure and scalable solutions. I aim to contribute to an innovative and collaborative environment, generating real impact in the digital payments sector while continuing to grow technically and professionally.

SUMMARY OF QUALIFICATIONS
Web Developer with 4 years of experience in front-end and back-end technologies. Strong expertise in building REST APIs with Java Spring Boot, working with relational databases (Oracle, MySQL) and non-relational (MongoDB). Project experience with React JS, Angular (v13 and v17), JavaScript, jQuery, Node.js, and TypeScript. Collaborative profile with experience in agile methodologies, continuous integration, automated testing, and a focus on usability, security, and performance.

PROFESSIONAL EXPERIENCE
Federal University of Paraná (Núcleo de Concursos)
Junior Systems Analyst
May 2023 – Present
- Full stack development using Angular (v13/v17) and Spring Boot (Java 8), integrating Oracle and MariaDB databases.
- Implemented document upload, calendars, reports, JWT authentication, and access control.
- Maintained legacy systems with jQuery and Spring MVC; developed modules for exam committees and selection processes.
- Data processing using PL/SQL focused on large-scale exams.
- Participated in all development stages including prototyping, user validation, testing, debugging, and documentation.
- Collaborated with technical team using GitHub, supported operational demands with a focus on security and performance.

VOLUNTEER EXPERIENCE
Volunteer Graphic Designer (May 2020 – Nov 2021)
- Created visual identities for small e-commerce businesses using CorelDRAW and Canva.
- Provided mentorship on Instagram marketing for new entrepreneurs.
